

Erosion (*chapter 11*)

MOVING sediment

1. Water

– A. waves (surf)

– B. runoff
(after rain or snow melts)

– C. streams/rivers

– D. groundwater

2. Wind

3. Ice (glaciers)

- Glaciers are rivers of moving ice (move slowly)
- carve the landscape as they move

4. Gravity

- A: landslides/rock fall
- B: mudslides/(lahars)
- C: avalanches -- snow falling downhill
